DOCUMENT VERSION

1.1 — 11 November 2026

SCOPE REFERENCE

Aligned with project scope agreed 10 November 2026

LIVE DOMAIN (TARGET)

www.elegantenterprises.lk

---

1. PURPOSE

This document describes the agreed functional and technical requirements for the Elegant Enterprises company website. It is aligned with the scoped work agreed on **10 November 2026** and reflects the delivered build in the project codebase (version 2).

The site’s business goals are to:

- Present Elegant Enterprises as a credible **manufacturer and wholesale supplier** of tissue, masks, baby care, and sanitary products in Galle, Sri Lanka.
- Help B2B buyers (distributors, hotels, institutions, retailers) understand products, services, and factory capabilities.
- Convert interest into enquiries via phone, WhatsApp, and an on-site contact form.
- Support discovery in search engines and answer-style results through on-page SEO, structured data, and location signals (GEO / AEO).

2. SCOPE SUMMARY (INVOICE MAPPING)

INVOICE SECTION	REQUIREMENT AREA	SUMMARY
A.1	Discovery & UI	Brand-aligned layout, typography, logo-based colour palette, responsive design across phone, tablet, and desktop.
A.2	Static frontend	Hand-coded HTML/CSS marketing pages (see Section 3). Core contracted set: **six pages** — Home, About, Products, Services, Factory, Contact.
A.3	UX & accessibility	Sticky header, mobile navigation, scroll reveals, reduced-motion support, ARIA on menu and quick-contact bar.
A.4	Integrations & basic SEO	Click-to-call, WhatsApp deep links, embedded map, favicon, unique meta descriptions per page.
A.5–A.7	Domain, hosting, go-live	Domain registration and DNS to production host; HTTPS; deployment and handover of live URL.
A.8	QA & revisions	Cross-device testing and agreed feedback rounds before launch.

INVOICE SECTION	REQUIREMENT AREA	SUMMARY
B.9–B.10	Email & contact form	Mail service configuration; API-based "Send by email" on Contact; templates per enquiry subject; validation and user feedback; WhatsApp fallback on failure.
B.11	Technical SEO, GEO & AEO	Schema.org JSON-LD, Open Graph / Twitter cards, `sitemap.xml`, `robots.txt`, location and speakable hints for answer engines.

> **Delivered beyond the six core pages:** an additional **FAQ** page (`faq.html`) is included in the live build to support buyer questions and FAQPage structured data (AEO). New pages added after sign-off are out of scope unless quoted separately.

3. SITE STRUCTURE & PAGE REQUIREMENTS

All pages share a consistent header (logo, primary navigation, mobile menu), footer (contact details, legal identity), brand styling, and quick-contact affordances on mobile.

PAGE	URL	REQUIREMENTS
Home	`/` or `index.html`	Hero with value proposition; product category highlights; trust/manufacturing cues; clear CTAs to Products, Contact, and WhatsApp/phone.
About	`about.html`	Company story, leadership/brand positioning, service area (Sri Lanka), link to factory and contact.
Products	`products.html`	Categories: tissue/serviettes, face masks, baby care, sanitary/hygiene; wholesale and retail pack positioning; schema for products where applicable.
Services	`services.html`	Manufacturing, private label/OEM, bulk supply, distribution partnerships; B2B-oriented copy and CTAs.
Factory	`factory.html`	Plant location, opening hours, embedded Google Map, directions; optional visit enquiry via Contact.
Contact	`contact.html`	Enquiry form (Section 5); phone, email, address; map; WhatsApp.
FAQ AEO	`faq.html`	Structured Q&A for wholesale ordering, products, private label, delivery; FAQPage JSON-LD for search/answer surfaces.

Global navigation

- Primary links: Home, About, Products, Services, Factory, Contact (FAQ linked from footer and/or contextual CTAs as implemented).
- Mobile: hamburger menu with backdrop; body scroll lock when open; `aria-expanded` on toggle.
- Mobile action bar (injected sitewide): Call, WhatsApp, "Get a quote" (Contact); hides on scroll-down after threshold.

4. DESIGN & BRAND

- **Visual identity:** colours derived from the company logo — primary sky blue (`#00a0d8`), deep blue (`#2868a0`), brand accent (`#007bb0`), navy footer (`#04243a`).
- **Typography:** Cormorant Garamond (headings), Manrope (body) via Google Fonts.
- **Icons:** Font Awesome 6.
- **Layout:** responsive, content-first; premium layer (`css/premium.css`) for polish; custom components in `css/site.css`.
- **Motion:** scroll-reveal animations where supported; honour `prefers-reduced-motion` for accessibility.
- **Assets:** logo (PNG/WebP), chairman/brand imagery as supplied; favicon from brand logo.

5. CONTACT FORM & EMAIL DELIVERY

5.1 Form fields & behaviour

- Fields: name, email, phone (optional where implemented), subject selector, message.
- Client-side validation before submit; disabled state and “Sending…” feedback during API call.
- Success and error notifications (auto-dismiss after ~10 seconds).
- If email API fails, user is guided to **WhatsApp** as fallback with pre-filled context where implemented.

5.2 Enquiry subjects & templates

Each subject uses a dedicated plain-text email template to **general@elegantenterprises.lk** (configured recipient):

1. Quote request
2. Bulk / distribution
3. Private label / OEM manufacturing
4. Factory visit
5. General enquiry

5.3 Technical integration

- Delivery via secure third-party mail API (Web3Forms) from the browser; site must be served over **HTTPS**.
- Access key stored in `js/contact-email-config.js` (not committed with secrets in production handover).
- **Volume limit:** up to **200 outbound emails per month** on the configured plan; higher volume requires a paid upgrade (client’s subscription).

6. INTEGRATIONS & CONTACT CHANNELS

CHANNEL	DETAIL
Phone	074 100 8160 — `tel:` links sitewide
WhatsApp	+94 74 100 8160 (`94741008160`) — `wa.me` with default greeting text
Email (display)	sales@elegantenterprises.lk

CHANNEL	DETAIL
Email (form)	general@elegantenterprises.lk
Map	Google Maps embed for 496 Akuressa Road, Galle 80000

7. TECHNICAL ARCHITECTURE

- **Type:** static site — HTML5, Tailwind CSS (CDN), project CSS/JS; no application server or database.
- **JavaScript:** `js/main.js` (navigation, reveals, mobile bar); `js/contact-form.js` (form logic and templates).
- **Hosting:** static file hosting with SSL; production hosting configured for the live site.
- **Deployment:** upload of site root; cache-busting via ?v= on CSS where needed.
- **Local preview:** any static server (e.g. `python3 -m http.server 8080`) or open HTML files directly.

8. SEO, GEO & AEO REQUIREMENTS

- Unique <title> and meta description per page; canonical URLs pointing to `https://www.elegantenterprises.lk/`.
- Open Graph and Twitter Card tags for sharing.
- JSON-LD as appropriate per page, including where implemented: Organization, LocalBusiness, WebSite, Product/Service, HowTo, BreadcrumbList, Speakable, FAQPage.
- Business NAP consistency: legal name, address, phone, geo coordinates, opening hours in structured data on key pages.
- `sitemap.xml` listing all public HTML URLs; `robots.txt` allowing crawl of marketing pages.
- Content written for Sri Lankan B2B buyers (English primary; locale signals en_LK).

9. DELIVERABLES

1. Complete static website source (HTML, CSS, JS, assets) deployed to production.
2. Domain registered and DNS pointed to live hosting.
3. HTTPS enabled on the live site.
4. Contact form configured and tested to company inbox.
5. Handover: live URL, hosting access as agreed, documentation for form/API key rotation (README in project).

10. OUT OF SCOPE

- E-commerce, shopping cart, payment gateway, or customer login portals.
- Content management system (CMS); content updates after launch via developer or separate maintenance agreement.
- Ongoing domain renewal and third-party email plan upgrades (billed by providers unless a maintenance plan is agreed).
- New pages, major redesigns, or new features after acceptance — quoted separately.

- Professional copywriting, photography, or video production unless explicitly added to scope.
- Multi-language (Sinhala/Tamil) site versions unless quoted separately.

11. POST-LAUNCH SUPPORT

- **Period: 6 months** from 10 November 2026.
- **Included:** bug fixes; corrections on existing pages; small improvements to features already on the site (contact form, navigation, SEO markup, integrations).
- **Not included:** new pages, new features, redesigns, or content writing — quoted separately when requested.
- **Contact form email:** up to **200 emails per month** on the configured mail plan. Higher volume requires upgrading the email service (handled by the client with the provider).
- **After support ends:** optional maintenance or ad-hoc work can be arranged by mutual agreement.

12. ACCEPTANCE CRITERIA

The website shall be considered accepted when all of the following are met:

1. All pages in Section 3 load correctly on current versions of Chrome, Safari, and Firefox on mobile and desktop.
2. Navigation, phone, WhatsApp, and map links work from every page.
3. Contact form sends a test enquiry to **general@elegantenterprises.lk** for each subject type, with validation and user-visible success/error states.
4. Live site is available at the agreed domain over HTTPS.
5. `sitemap.xml` and `robots.txt` are reachable; primary pages contain expected meta and structured data without critical errors in Google Rich Results Test (or equivalent).
6. Client confirms content accuracy for company name, address, phone, and product/service descriptions (or provides correction list within the QA window).

13. SIGN-OFF
